

Promo codes: product spec

Cartwheel storefront · v1.0 · Approved for development

Shoppers can apply one promo code on the cart page to get a discount or free shipping, and can check any code on the Offers page. The server calculates every amount; the web app shows what it returns.

Codes

All dates are in India Standard Time (IST).

Code	Gives	Min. order	Max. discount	Valid	Limit	On Offers page
WELCOME10	10% off	₹999	₹300	Always	Once per email	Yes
FLAT250	₹250 off	₹1,999	—	Always	—	Yes
FREESHIP	Free shipping	—	—	Always	—	Yes
BOOKS20	20% off items in Books	—	—	Always	—	Yes
DIWALI25	25% off	₹2,999	₹1,000	15 Oct – 5 Nov 2026	—	Yes
MONSOON15	15% off	₹499	₹200	1 Jul – 15 Sep 2026	—	Yes
LIMITED5	₹100 off	—	—	Always	5 uses in total	No

Rules

Subtotal is the price × quantity of every item, before any discount and before shipping. Shipping is ₹99 when the subtotal is below ₹999 and free from ₹999.

1. **Entering a code.** Spaces around it are ignored and letter case doesn't matter. Codes are shown in upper case. A code is 3–20 letters and digits.
2. **One code per order.** A new code replaces the applied one. If the new code fails, the old one stays.
3. **Minimum order.** Met when the subtotal is **equal to or above** the minimum: a ₹999 subtotal qualifies for WELCOME10.
4. **Percentage.** Subtotal × percentage, **then** capped at the maximum discount: WELCOME10 on ₹7,999 gives ₹300.
5. **Flat.** The amount off, never more than the subtotal.
6. **Free shipping.** Shipping becomes ₹0. If the order already ships free, the code still applies.
7. **Category.** The percentage applies only to that category's items. With none in the cart, the code fails.
8. **Totals.** The discount is rounded **down** to whole rupees. Total = subtotal – discount + shipping, and shipping is worked out on the subtotal **before** the discount.
9. **Dates.** A dated code is valid from 00:00:00 on its first day to 23:59:59 on its last day.

- 10. **Limits.** A use counts only when an order is placed. "Once per email" is checked when the order is placed, because the cart doesn't know the email.
- 11. **Which error.** If several things are wrong, only the first in this order is shown: format, unknown code, not started, expired, usage limit, already used with this email, empty cart, minimum order, category.
- 12. **Cart changes.** The code is checked again whenever the cart changes. If it no longer qualifies, it is removed and the shopper sees "{CODE} was removed. {reason}".
- 13. **Refresh and checkout.** An applied code survives a page refresh. The server checks it again when the order is placed. If it fails, no order is placed, the code is removed and the reason is shown on the checkout page.

Messages

{CODE} is the code in upper case. Dates read like 15 Oct 2026 .

When	Message
Applied	{CODE} applied. You saved ₹{saving}. ({saving} is the discount plus any shipping the code removes.)
Applied, order already ships free	{CODE} applied. Your order already ships free.
Letters and digits only	Promo codes contain only letters and numbers.
Unknown code	We couldn't find the code {CODE}.
Not started	{CODE} starts on {first day}.
Expired	{CODE} expired on {last day}.
Usage limit reached	{CODE} has reached its usage limit.
Already used with this email	{CODE} has already been used with this email.
Empty cart	Add items to your cart to use a promo code.
Below the minimum	Add ₹{shortfall} more to use {CODE}.
No items in the category	{CODE} isn't valid for items in your cart.
Network error	Couldn't apply code. Please try again.

Screens

- **Cart:** "Have a promo code?" opens a box with a Promo code input, an Apply button and a message line. Once a code is applied, "{CODE} applied" and a Remove link appear. When the discount is above ₹0, the summary shows a Promo row between Subtotal and Shipping, e.g. "Promo (WELCOME10 · 10% off) – ₹300".
- **Checkout, order confirmation and Admin → Orders** show the code and the discount. Admin → Orders has Promo and Discount columns ("—" when none).
- **Offers** (/offers, "Offers" in the main navigation): a "Check a code" box that works for any code without a cart, and a card for each listed code with its benefit, conditions, status (Active, Not started or Expired) and a Copy button that shows "Copied" for two seconds. The code on every card is fully readable at every screen width.

- **Phones:** the cart summary, the promo message and the Promo row fit without scrolling sideways and are not hidden by the checkout bar.
